Subject: REACH Compliance

Dated: 1 January, 2017

Summitech LLC is committed to compliance with all known US and International treaties on the use and/or prohibition of dangerous substances.

The REACH Directive, officially known as REACH EC 1907/2006 (Registration, Evaluation, Authorization, and Restriction of Chemicals), is a European Union regulation dated 18 December, 2006. It requires all companies manufacturing or importing chemical substances into the European Union in quantities of one ton or more per year to register these substances with the ECHA (European Chemicals Agency) in Helsinki Finland.

REACH also addresses substances of very high concern (SVHC) because of their potential negative impacts on human health or the environment. From June 11, 2011; the ECHA must be notified of the presence of SVHC if the total quantity used is more than one ton per year, and if the substance is present at more than 0.1% of the mass of the object.

This statement declares that products provided for sale by Summitech LLC, to the best of our knowledge, are in conformance with the requirements of REACH. Summitech audits all production facilities and requires suppliers and sub-suppliers to provide certificates of compliance; such documentation can be obtained by contacting Summitech LLC via the methods shown at the top of the statement.
